Global Presence

More With Less – Climate Resilience – Wholesome Food – Farm & Community Well Being

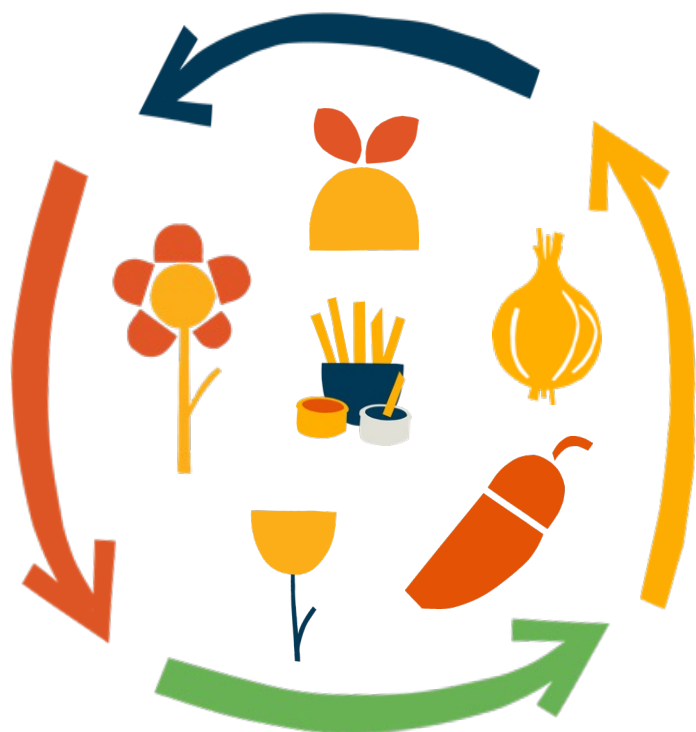

Today's AG for Tomorrow's World

- Modern Ag feeds more people
 - Population is on the rise
 - Trend is to farm with fewer acres (N. America)
- Greater concerns about climate
 - Footprint of manufactured fertilizers
 - Minimize farm emissions
- Human and environmental health
 - Alternatives to synthetic inputs
 - Culturing the in-field ecosystem
- Greater rift between farm and consumers
 - People do not appreciate farming complexity
 - Small fraction of people directly in Ag
